

GridGain Examples

This folder contains all examples shipped with GridGain including examples for Java, Scala, Groovy, PHP with REST access as well as configuration and other miscellaneous files.

If you are using IDEA or Eclipse Java IDEs you can open pre-configured projects by either clicking on [idea_users_open_this_file.ipr](#) file or following instructions in [eclipse_users_read_here.txt](#). Both files are located in the root of GridGain installation.

'config' folder

This folder contains GridGain XML configuration files. You'll need various configuration file (i.e. settings) to run various example. Each example always has documentation on what specific configuration (i.e. configuration file) it requires.
