GridGain Examples

This folder contains all examples shipped with GridGain including examples for Java, Scala, Groovy, PHP with REST access as well as configuration and other miscellaneous files.

> If you are using IDEA or Eclipse Java IDEs you can open pre-configured projects by either clicking on `idea_users_open_this_file.ipr` file or following instructions in `eclipse_users_read_here.txt`.
> Both files are located in the root of GridGain installation.

'php' folder

This folder contains PHP example of accessing GridGain via REST APIs as well as using `memcached` protocol for accessing GridGain's In-Memory Data Grid.
